

Redundant Recording Solutions

Easy Recording

Easy Reporting

Easy Transcribing

The Problem: Courts that electronically record their proceedings have primary and archived copies of the recordings. In the case of a recorder failure, however, they generally have no backup. In several states courts have retried cases where the primary electronic record was lost or unavailable for transcription on appeal.

The Solution: Record Solutions builds on Veri-Core's Disaster Recovery Recorder software to deliver single-channel recording solutions that INDEPENDENTLY capture the live event from the same audio sources as the primary recording system. This redundant recording solution works with ANY primary recording system, regardless of vendor.

The Configuration:

- Veri-Core Disaster Recovery Recorder Software
- Small footprint rackmount PC

When it comes to the Record . . . *Easy Does It!*

Record Solution's team of recording, reporting and transcribing specialists have years of experience preserving the record. Contact our expert sales team at 732-625-1318!
